

WHITBY™

Warm contemporary appeal

WHITBY™

A stylish and compact series, ideal for creating a warm, full featured office environment.

Whitby is a stylish and compact series, ideal for creating a warm, functional office environment, yet progressive and durable enough for home office applications. With so many shapes and sizes of worktables and storage options, complete with "media support modules", Whitby is equipped to handle today's technology.

Wall Tables and Wall Extension modules are designed to function as "digital hubs" to easily accommodate CPU's, printers, scanners and supplies in a single compact unit. These worktables integrate effortlessly with wall units and storage accessories to create fully functional offices while still conserving valuable space.

To maximize vertical storage space, Whitby offers stackable 15" deep wall units and hutches in 3 heights — 29", 53" or 78". Wall units are able to accommodate most current personal electronic equipment, such as printers, speakers, fax machines and scanners.

To complete your personalized workstation, options include silver or black tapered legs, casters, feet, drawer handles, and door frames. Units accepting doors offer solid laminate or glazed styles, including clear, frosted or "rice paper" glazing for a complete workspace that looks as good as it works.

Shown in Tiger Mahogany with Black Nickel trim and Azeo seating

Modular storage components can be grouped together to create complete wall systems

Hanging file drawers can accommodate letter and legal size filing

Doors can be added to hutches, cabinets, wall units and towers

Doors are also available with an aluminum frame (finished in Silver or Black Nickel) with clear glazed inserts, frosted glazed inserts, or rice paper glazed inserts

Various worksurface shapes can be used as returns, islands or end end caps (Delta shown above)

Many table components feature a built-in pull-out shelf to accommodate a CPU and/or printer, fax machine, scanner, etc.

Contemporary bow shaped handles are standard on all drawers and doors and are offered in Silver or Black Nickel

Adjustable feet are standard on all pedestal and storage components and are offered in Silver or Black Nickel
