Innovative push-button technology and comfort

Exclusively from Global

is the culmination of more than thirty years of leadership in seating design and development.

COMFORT AND CONTROL AT YOUR FINGERTIPS

Our new, exclusive push button chair control system allows you to choose the most comfortable settings easily and without having to find hard-to-reach handles. Depending on chair model, you can control back angle, seat height adjustment, even the tilt-lock control at the push of a button.

#### General

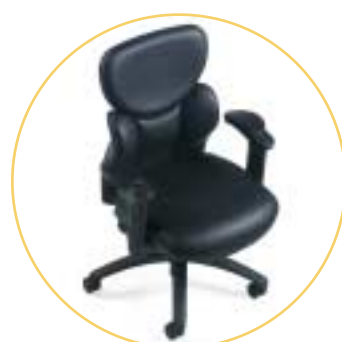

- Industry first in design and development
- A seating innovation that sets a new standard in "office seating" and moves the work environment to a more performance driven, comfortable place
- User-friendly, easy to operate and conveniently located push button controls – make adjustment easy
- Patented technology designed and developed by Global allows push buttons to be incorporated into either arms or seat edge to encourage easy and simple adjustments

#### Ergonomics: Push button adjustment offers a significant ergonomic advantage:

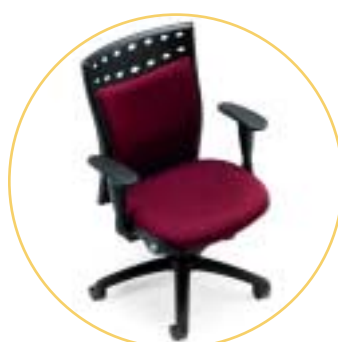

- Simply stated, the easier it is to adjust your chair, the more likely you are to actually use those adjustments
- Controls/buttons are in full view to make it easier for users to adjust their seating positions
- Awareness of adjustments is one of the critical factors for successful use of controls
- Adjustments are easy to operate, thus providing a good fit that matches, supports and moves with your body
- Encourages movement while performing daily seated tasks
- Ergonomists recommend minor but constant movements to help eliminate muscle fatigue to help maintain an individual's alertness and productivity levels

# CONCORDE®

Concorde® is available in both regular and wide models, with two seat depths to fit people of all shapes and sizes.

## Large & Tall

2400-18  
High Back Multi-Tilter  
Deep Seat 18.5"

Concorde is an industry 'first', providing push-button control of seating positions from the arms of the chair. Push-button control – the standard in luxury automotive and aircraft seating – is now the new world standard in workplace seating with Concorde. Innovative and unique, Concorde provides state-of-the-art ergonomic seating for management, and offers models for tall/large applications. What makes it unique is Concorde's arm-mounted push-button controls. Press once, and Concorde floats free. Press again, and Concorde locks firmly in position(s). Exceptional comfort, perfect support and a limited lifetime warranty are yours with Concorde.

Janet Richardson,  
Fund Manager (5ft-11in.)

Mike Williams,  
Defensive End (6ft-7in.)

Available in two different depths 16" & 18"

Available in two different widths 19" & 21"

Each Arm Adjusts in/out 1 1/4"

NuCAS®

BUTTONADJUST®

# Comfort and control at the touch of a button

NuCAS is the next generation of seating technology. It's a simple idea . . . made possible by years of extensive research and development. A new system of control activation allows easy seating position adjustments and comfort without getting out of your chair or changing your body position. Simply push one of the buttons to adjust the seat height, back angle, tilt angle, arm height and arm width. It's a simple idea . . . and it's only available from GLOBAL.
